Engineer Mike Davy stated that the plan includes spot repairs of the sanitary sewer in four locations. During the fall, the entire section of sanitary sewer from South Pine to South Kingston will be lined with a no-dig, cured-in-place pipe. The section of storm sewer necessary to connect the Justice Center to the existing storm sewer is also included. The street will be restored when the excavation work is completed with one lift of bituminous installed this fall and the second lift installed early next summer. Davy also noted that the County planned to install storm sewer and restore the street disturbed by the storm sewer, sanitary manhole and watermain connection as part of their project. This work was added to the City's project in order to keep most of the work within the street under one contract. The County has requested a breakdown from their contractor in an effort to determine a reasonable deduction. The County will then pay the City for the work performed on the County's behalf. Davy estimated that the County's share would be approximately \$48,600. Substantial completion of the spot repair sewer replacement and storm sewer work is anticipated by October 15, 2010. The second lift of bituminous is expected to be completed by June 1, 2011. Substantial completion of the no dig liner work is expected around December 10, 2010. Davy and City Clerk/Administrator Feely will be in contact with Minnesota Rural Water Association in an attempt to arrange interim financing to cash flow the 2010 costs with the intent to arrange long term financing through a bond issue that would include the 2011 Sewer Rehabilitation work. A motion was made by Mayor Burns, seconded by Member Lemke to award the South Street Sewer Rehabilitation Project, with an anticipated total dollar value of \$308,960.50, to Winona Mechanical for Spot Repair Sewer Replacement and Storm Sewer and Lametti and Sons, Inc. for No Dig Liner work. Voting in Favor: Burns, Lemke, Vick, and

Murphy. Voting Against: None. Absent: Perry. All members present voted in favor and the motion was declared carried.

C. FUTURE NEEDS OF WWTP. Davy Engineer Mike Davy noted that it's been over 15 years since the last major upgrade at the Caledonia Wastewater Treatment Plant. The new portions of the plant are approximately 20 years old and the basic plant is 45 years old. Davy stated that performance is still good and routine maintenance has kept things running reasonably well. The process is relatively complex so having experienced operators has been a big advantage in Caledonia. Davy highlighted the following WWTP items that need to be addressed: aging equipment and structures; encroachment on the site –when first built, the facility was outside of town; now it's surrounded by other development; new phosphorus regulations; karst concerns with the discharge; Sno Pac Foods wastewater treatment needs; improving the energy efficiency of the process; simplifying the process to improve operability and stability. Davy noted that it's in the City's best interest to keep control of the schedule for major projects rather than being forced into meeting a compliance schedule by a regulatory agency. Davy stated that the first step would be to authorize a preliminary engineering study. Doing so would position the City for funding programs. A study that determines that retrofitting and upgrading of the existing facility is the best course of action and would likely cost between \$25,000 and \$50,000. A study involving a new site would cost approximately \$50,000 to \$75,000. It takes about twelve months to prepare and approve a facility plan. Davy and City Clerk/Administrator Feely will work on exploring financing options. A motion was made by

Mayor Burns, seconded by Member Lemke to authorize the preparation of the WWTP study. All members present voted in favor and the motion was declared carried.
